

Expert 1.3K-FA or Expert 1.5 K-FA???

With the presence of the new Expert 1.5K-FA on the market, this does not mean that the production of the Expert 1.3K-FA is suspended.

Actually, these are two wonderful products with some important differences designed into each amplifier to best cover all the different needs of our customers.

Dimensions and weight are identical between the two amplifiers.

This to keep the unmatched portability of the 1.3K-FA for the DXpeditions that has made this amplifier irreplaceable and unmatched.

The differences between the 1.3K-FA and the 1.5K-FA are as follows.

(Please note that all the other features are identical in the two models.)

Expert 1.5K-FA

- Solid 1.5 KW PEP output on every band and mode.
- Pre-distortion output connector for incredible linearity with SDR.
- Non-ATU and non-FCC versions are NOT an option with the 1.5K-FA.
- Cost 3600 Euro + VAT (where imposed).

Expert 1.3K-FA

- Solid 1.3 KW PEP on every band and mode.
- Possibility to transmit with reduced power on 70 MHz band (typ. 300W +/- 1dB)
- Possibility to purchase the 1.3K-FA “without ATU”.
- Possibility to purchase a 1.3K-FA non-FCC version (high gain).
- Cost 3250 Euro + VAT (where imposed).
